

Do I Need a Social Security Lawyer When They Review My File?

Q: When will I receive my first check?

A: If your application for Social Security disability is approved, the state Social Security board will determine a "date of onset," or a date when you were no longer able to work because of your disability. You are eligible to receive benefits five months after your date of onset. You will actually not be paid until your sixth month, since all payments are distributed at the end of the month. You will not receive payments for the five month waiting period. It is possible to be paid retroactively, if it is proven that your condition was present prior to your application for disability benefits. Back payments can be made retroactively for up to 12 months. If you believe you are eligible for back payments, you may wish to seek counsel from a social security lawyer to help you apply for retroactive benefits. Given that the application and review process for claims can be quite lengthy, a good number of claimants are awarded benefits retroactively.

Q: Will my children receive benefits? A: Payments to dependents are determined by the amount of your Social Security contributions. Your child may be entitled to receive monthly benefit amounts of about 50 percent of your full monthly benefit amount. There is a cap on the amount for which dependents are eligible. As previously mentioned, that amount is dependent upon how much you have contributed to Social Security over your time in the workforce. To be eligible, a child cannot be married. He cannot be older than 18, unless he is a student (students cannot be older than 20 to be eligible.) Your dependents will not qualify as part of your benefits, if you collect Supplemental Security Income payments. If you have any questions about qualifications for dependents, you may wish to contact a social security lawyer.

Q: Does my case continue to be reviewed after benefits have been awarded?

The administration does evaluate your records from time to time. Until you are able to return to work or reach the age of retirement, your file will be subject to Continuing Disability Reviews (CDRs.) A periodic CDR will give the disability examiner current information on your medical condition, treatments and status. The Social Security Administration is supposed to do the reviews every one, three and seven years, but they currently have quite a backlog. Given current backlogs, your file could be undergoing a CDR at any point. You will maintain your benefits, until your injury has changed or you are able to work enough to bring in at least \$940 monthly income. SSI benefits will discontinue if your income is no longer below the income criterion. You may wish to seek the counsel of a social security lawyer, if you have any questions or concerns about returning to work while currently receiving benefits.
